Want to contribute to a dynamic and family company culture that will feed the world population of tomorrow?

Find out more about our Breeding community

Our Objective is to offer every farmer- whether they use conventional or organic farming methods - targeted varieties and solutions to fit their operational needs, while also optimally tailored to the climatic conditions and specific geological conditions of their respective regions. This is the basis for efficient and productive agriculture.

With our high-performance seed for corn, sugar beet, cereals, rapeseed, sunflowers, soybeans, catch crops, etc., we offer a wide range of products that meet the most diverse requirements in temperate and tropical climates and enable balanced crop rotation. We rely on continuous improvement! So technological innovation is at the core of our business as we know that this is the motor that drives the production development.

As a well-established seeding company KWS is always on the look for the innate problem-solver, analytical thinker, and team player that are enthusiastic about both outdoor and indoor work and that will reinforce our KWS Breeding Family. We want the people who are brave enough to take on new challenges, who perform not only operational tasks but are also willing to optimize our processes, to challenge the status quo, and to work with people across the globe!

Do you want to be part of this innovative breeding departments to seed the future?

Seed your career forward with KWS and submit your unsolicited application online via our Talent Community!

### About KWS

KWS is one of the world's leading plant breeding companies. Over 5,000 employees in more than 70 countries generated net sales of around €1.8 billion in the fiscal year 2022/2023. A company with a tradition of family ownership, KWS has operated independently for 165 years. It focuses on plant breeding and the production and sale of seed for corn, sugar beet, cereals, vegetables, oilseed

rape and sunflower. KWS uses leading-edge plant breeding methods to continuously improve yield for farmers and plants' resistance to diseases, pests, and abiotic stress. To that end, the company invested more than €300 million last fiscal year in research and development. For more information: [www.kws.com/career](http://www.kws.com/career).
